

ultra cura

high dependency chair

suitable to
treat pressure
sores up to
stage 4*

Unique in the UK, the ultra cura chair further strengthens Benmor's range of versatile bariatric solutions.

The chair is an effective combination of pressure care, mobility and positional adjustment for the bariatric patient.

It is the only fully mobile, hoist friendly bariatric chair with integral pressure care features.

The chair has a tilt-in space reclining function and will continue reclining until it is in a completely horizontal position.

Arms can be swapped to gain extra width or removed altogether.

Available Sizes for Rental Only
Seat width 700mm (28") Weight capacity 349kg (55st)

features	benefits
349kg (55st) weight capacity	Strong enough for the largest bariatric patients
700mm (28") seat width	Suitable for a variety of patient sizes
Fully integral pressure care in seat and backrest areas	Very high levels of comfort and pressure relief for large patients who can be vulnerable to tissue damage
Fully mobile	Mounted on large directional locking, centrally braked twin castors for stability and mobility
Electrically adjustable tilt-in-space	Less room is required behind the chair when reclining
Elevating length adjustable legrest with padded foot support	Can be easily adjusted for taller patients
Hoist friendly	Large clearance under base for compatibility with a bariatric mobile hoist

*when used in conjunction with an alternating air cushion
